AERO

AERO is the new jet born from military and futuristic inspirations, projected in MOMODESIGN style centre. It has got a unique and compact design, with a strong personality that encloses in itself all the features of a premium product: great aerodynamics, an innovative "patent pending" visor movement, an intelligent ventilation system, all for a top-level safety. AERO is a Made in Italy product with a high technology content.

AERO

Apart from the traditional ventilation system, AERO is provided with an intelligent ventilation system with smart control, activated by downloading MOMODESIGN TORNADO 1.0 app (for Android and Apple smartphone). This system can automatically maintain the helmet internal temperature constant, also in case of insufficient air flow, like driving at less than 50 km/h or while stopping at traffic light. This way the helmet becomes an "active" element with a consequent raise in comfort and safety for the motorcyclist.

V E N T I L A T I O N S Y S T E M

AERO

INTERNAL MECHANISM

The wide Antiscratch and Antifog transparent external visor has been realized flush with the shell. The classic external visor movement has been eliminated, and a new visor system of "patent pending" has been projected and patented. The integrated system IVS has been obtained from the space between the shell and the EPS, and guarantees a great refinement in figure as far as design, the absence of aerodynamic whispers as far as comfort, and as far as safety the reduction of the risk of helmet tripping on the asphalt in the event of sliding and cause cervical injury. The two springs positioned in the IVS make the visor movement extremely fluent following the rising of the visor while opening, and stopping it while closing, thus avoiding the fortuitous opening.

(PATENT PENDING)

AERO

DESIGNED BY THE WIND

AERO has been thought as a single entity, where the shell shape meets and merges the wide external visor, its shape proposes a new design concept planned to give the helmet greater aerodynamics and raise its performance. Thanks to its unique and compact design, AERO gives the customer a broad visibility and noiselessness.

aerodynamic
shell
design
A.S.D.

MORE STABILITY

AERO

AERO is also supplied with UV400 sun visor, it has wide visibility and an internal flush activation mechanism commanded by a running on shell board.

SUN VISOR

NO GAP VISOR

The wide Antiscrash and Antifog transparent external visor has been realized flush with the shell.

TORNADO APP

Tornado is an app that runs the system of forced ventilation with a magnetic levitated fan with a capacity of 5 air litres per minute (6 in "turbo" function).

Loudness limited to 16 db at full capacity. **Battery** 1,8A 3,7v li-ion battery rechargeable in 1,5 h through micro usb and 1A power charger.

System functioning 8h in urban environment condition between -20 and 40 c°.

Connection through Bluetooth protocol. **GPS module integrated** and temperature probe that registers internal temperature in the upper part of the helmet.

MOMODESIGN VENT COMFORT software can be set up from Your smartphone through the APP MOMODESIGN TORNADO 1.0, it is independent and autonomous and runs the magnetic levitated vent in a smart way.

Through the APP You can set:

- desired temperature (the software decides fan speed according to internal temperature and cruising speed)
- fan control (Fan Control function);
- TURBO VENT function in high temperature condition guarantees the maximum refreshment (thus reducing battery duration);
- ECO function that optimizes battery duration;
- Helmet internal temperature monitoring while driving.

HORNET

HORNET, the first MOMODESIGN full face helmet, represents the evolution of the brand towards a new section of motorbike helmets. It is an essential and versatile full-face helmet, thanks to the two versions presented, the one in monochromatic and the one with sport graphics. HORNET has been projected for the touring-road customer, it embraces MOMODESIGN peculiar stylistic elements: sport soul, elegance and technical materials.

H O R N E T

The ventilation system is composed by:

- chin air vent;
- two frontal air vents;
- two superior air vents with sliding mechanism;
- two air extractors on the chinguard
- two extractors on back spoiler

VENTILATION SYSTEM

H O R N E T

INNER PADDING

The internal liner, inner padding and cheekpads are all made in Satinized Actifresh cloth, are removable and washable.
Retention system: Micrometric

HORNET has got a contemporary and sport design, with a balance in the contrast between resolved lines and soft shapes. It has been projected by MOMODESIGN style centre to give the helmet even more aerodynamics, and to grow performance guaranteeing comfort, noiselessness and safety to the motorcyclist.

AERODINAMIC SHAPE

TWO VISORS

The external visor mechanism has got rapid release and anterior blocking system to reduce the risk of fortuitous opening and closing. The visor is Antiscratch and Antifog. The internal sun visor can be moved by external activation mechanism.

CARBON FIBER

HORNET external shell is completely produced in fiberglass and carbon fiber to offer maximum level of safety and protection in a restrained weight. Hornet has been developed in two external shell sizes (sizes from XS to XL) and in two EPS sizes.

ZERO

MOMODESIGN style center office has projected ZERO model strongly connected to its origin, but having a contemporary vision, thinking to those bikers that are looking for a helmet with a modern design and with an heritage spirit that takes the brand back to its history tied to motor racing atmosphere, especially to F1 world. The classical historical colours of the racing world, yellow and red have been revised with a contemporary graphic. ZERO is a helmet with a handmade and industrial flavour at the same time, it is produced with premium material that guarantee a high quality manufacture, material like leather used to refine the internal lining and the back goggle stop with Momodesign logo.

FGTR

Unique shape, elegant core, outstanding design and technical highlights. FGTR was born in 2000 as the Urban Demi-Jet Helmet. Historically inspired by the helmets of helicopter pilots it became a cultural phenomenon, a conjuncture between Momodesign's racing past and its present as a design brand that is 100% Italian. This is the best product to exemplify Momodesign reinterpretation of an object designed for daily use.

FGTR

EVO

TWO VISORS

An adjustable external visor anti-scratch UV 400 in optical class with support in carbon fiber and integrated dark sun visor.

Removable inner padding in anti-bacteriological memory fabric with a more comfortable fit.

INNER PADDING

INSPIRATION

The inspiration for the shape comes from military helicopterist helmets with their rounded visors. "FGTR" has special Soft touch paint, hand-sewn leather and carbon fiber details: a balanced mix of Italian style, technology and design.

REVERSED T LOGO

The upside-down T logo was a winning concept born to go against to the trend and the style of the beginning of 21st century.

GRAFENE 1.0 2019
1001005001

IN COLLABORATION
WITH:

1ST GRAPHENE MOTORBIKE HELMET

The first graphene helmet ever made, result of the material quality, production process and reached performances. The Graphene due to the material's particular properties, is able to distribute the force of an impact better than any other material. Graphene is also an excellent conductor of heat. This additional property has enabled us to create an avant-garde helmet whose high impact resistance is maintained even under conditions of extreme ambient temperatures. Due to graphene's capacity for dissipating heat, the helmet's thermoregulatory outer shell allows the wearer to feel comfortable even during direct exposure to the sun. The project has come about thanks to the close and prestigious partnership between IIT's Graphene Labs and Momodesign Style Center. Research, innovation and use of two-dimensional materials. A new era of Momodesign helmets.

MOMODESIGN helmets are manufactured and distributed worldwide exclusively by:
Logico Design S.r.l. - Piazza Kennedy, 4 – 37039 Tregnago - VR – Italy - Phone: +39 (0)45 6500447
Fax: +39 (0)45 7808214 - info.LD@joysonsafety.com

Momodesign has signed an agreement with the American company KSS (KEY SAFETY SYSTEM) now JOYSON SAFETY SYSTEM, a global leader in advanced automotive safety systems, making the "safety culture" for which KSS is known worldwide the new cornerstone of Momodesign. This partnership will help to bring ever-increasing levels of safety and technology to motorbike helmets, the pivotal products of MOMODESIGN.
